I was awarded a BSc (Hons) in Internet Technologies from the University of Paisley which has provided me with not only a thorough understanding of Internet based technologies but also with an excellent grounding in most commonly used computer applications.

I have well developed organisational and interpersonal skills, and after a wide and varied employment history, I have found myself to be a good team player who can work equally well independently.

I take pride in being thorough in all aspects of my work, and I am also an enthusiastic and quick learner who keeps up with new developments.

Education

University of Paisley BSc (Honours 2.1) Internet Technologies	2003 – 2005
---	--------------------

Core areas of study included:

Project work

This involved intensive scheduling of tasks and an ability to conduct advanced research under my own initiative. On two occasions I was elected Project Co-ordinator by my fellow group members and oversaw the successful completion of these projects within the specified time frame. The Honours project in my final year saw the development and implementation of a Web-based e-learning application designed to deliver on-line music tuition.

Web Development

Solid skills in hand-coding XHTML documents for the web were consolidated with CSS techniques and Client Side Scripting, using JavaScript. I also established a competency in programming Active Server Pages using VBScript with Structured Query Language (SQL) and animation for the web using Macromedia/Adobe Flash. I am currently developing further skills in PHP5 and MySQL.

Database Design Theory

I developed a comprehensive understanding of the concepts involved in the design of Relational Database Systems and how databases can be used to support the organizational decision making process.

Server Technologies

I also developed a thorough understanding of the various servers that provide the Internet with its essential functionality. This included the configuration of Windows IIS and Apache Web Server Software.

Reid Kerr College, Paisley HND E-Commerce	2000 – 2002
---	--------------------

E.C.D.L.	2000 - 2001
----------	-------------
